Delphi Technology's OASIS Claims Recognized in Celent's Core Claims Systems Vendors 2008 Report

Report shows OASIS Claims users give the system and dti high marks

Boston, MA (February 10, 2009) - Delphi Technology, Inc. (**dti**), an established provider of technology solutions to the property and casualty insurance market, announced today that industry analyst firm Celent has recognized **dti's** OASIS Claims solution in their *Core Claims Systems Vendors 2008* report. The Celent report evaluated vendor claims systems based on: advanced technology, breadth of functionality, customer base and depth of customer service.

The report included a brief history of the **dti** claims solution, first released in 1994 as a medical malpractice claim solution. In recent years **dti** has broadened the lines of business covered to include workers' compensation, legal professional liability and other professional liability lines. The most recent version of OASIS Claims, 2008.2, was released in May 2008.

Donald Light, senior analyst with Celent's insurance group and author of the report, commented, "With a strong foundation in the medical professional liability sector, **dti** has been working to broaden OASIS Claims' product coverage. It has made a good start with five insurers using it for workers' compensation."

The report also highlighted the overall positive customer references for **dti's** OASIS Claims, including:

- features and functions rated as very good to excellent;
- implementation experiences were rated very good to excellent;
- one reference called **dti** knowledgeable and very responsive; and
- another praised OASIS Claims' integration with other OASIS components.

Delphi Technology's President Sam Fang notes, "We are pleased with the recognition for our OASIS Claims solution in the Celent report. **dti** has been hard at work to leverage our success in the medical malpractice space to expand our market presence into other lines of business, including legal professional liability and workers' compensation."

Fang continued, “We were especially happy to hear the positive **dti** customer feedback noted in the Celent report. The **dti** team strives to work closely with our customers to help them achieve their business goals. We also solicit their input to help us to continue to enhance our product and service offerings. We thank them for their continued support and for the strong showing for **dti** in the Celent report.”

About Celent’s Core Claims Systems Vendors 2008 Report

Celent provides a detailed look at 21 core claims systems offered by 19 vendors. The report features Celent’s ABCD Vendor View. The ABCD Vendor View presents a comparative view of the vendor marketplace that visually represents four elements: Advanced technology and technical flexibility, Breadth of functionality, Customer base, and Depth of client services and solutions. The report also describes how replacing a legacy claim system with a modern one provides benefits that align with three key corporate strategies: growth, efficiency, and underwriting success.
