

Delphi Technology Appoints Jason Potosky as Executive Vice President of US Operations and Chief Technology Officer

Potosky to Drive Technology Strategy and Architecture Roadmap

Boston, MA – April 29, 2009 – Delphi Technology today announced the appointment of Jason Potosky as Executive Vice President of US Operations and Chief Technology Officer (CTO) to lead the company's technology and architecture strategy across its OASIS product portfolio. Effective July 1, Potosky will be responsible for ensuring a clear and strategic roadmap for Delphi Technology's products in order to deliver best practices, ongoing innovation and long-term value to customers. As Executive Vice President of Development and CTO, Potosky will lead the company's efforts around emerging technologies, as well as play a leading role in the long-term direction of Delphi Technology's research and development plans for future product development.

"Jason's successful track record at Delphi Technology clearly demonstrates his innovative and entrepreneurial spirit and alignment with Delphi Technology's approach of empowering customers with continuous innovation," said Sam Fang, Delphi Technology's CEO and Founder. "OASIS provides Delphi Technology's customers with the cutting edge technologies needed to enable them to optimize their business processes and respond to changing business needs resulting in reduced costs, increased operational efficiency, and improved business intelligence. By establishing the Office of the CTO under Jason's leadership, we are affirming our commitment to continue to drive innovation at Delphi Technology and to help our customers increase their competitive advantage and accelerate innovation in their own businesses."

Potosky assumes the role of Executive Vice President of US Operations and Chief Technology Officer (CTO) after serving as Senior Vice President of Development at Delphi Technology. Prior to this role, Potosky was the Director of Development responsible for the design and development of Delphi Technology's new suite of web-based Java-compliant applications. Before joining Delphi Technology, Potosky worked for Accenture and was responsible for implementing, customizing, and installing both customized and packaged software applications for Fortune 500 companies.

Potosky holds a Bachelor of Science in Mechanical Engineering from the University of Michigan.

About Delphi Technology

For more than 15 years, Delphi Technology has been a leading provider of technology solutions to the insurance and risk management industries. By leveraging its extensive industry knowledge and experience, Delphi Technology delivers a comprehensive range of innovative technology solutions for property and casualty insurers, third party administrators (TPAs), self-insureds, and risk retention groups (RRGs).

Delphi Technology's OASIS suite provides proven software applications to run core insurance operations including underwriting, billing, policy administration, claims management, financial management, risk assessment, and reinsurance. OASIS enables companies to optimize their business processes and respond to changing business needs resulting in reduced costs, increased operational efficiency, and improved business intelligence.

Delphi Technology's professional services staff of 150+ technical and insurance experts utilize a proven implementation methodology ensuring the transfer of necessary market and business expertise throughout the deployment process resulting in successful implementations that come in on schedule and on budget.

Headquartered in Boston, MA, Delphi Technology has sales, support and development offices throughout North America as well as in Shanghai, China.
