**Delphi Technology Joins ISO's Alliance Program**

Boston, Mass., January 21, 2015 — [Delphi Technology](#), the recognized leader in providing business software solutions to the healthcare professional liability industry and an emerging provider of business software solutions to the property/casualty insurance industry, announced today that Delphi has successfully integrated ISO Electronic Rating Content (ERC) and has joined ISO's ERC Associate program. ISO is a Verisk Analytics (Nasdaq:VRSK) business.

"With the achievement of this milestone, Delphi Technology is positioned to offer carriers a new way to access and manage ISO content," said Sam Fang, CEO, Delphi Technology. "Delphi's integration with ISO Electronic Rating Content will enable insurers to significantly reduce their product configuration and maintenance, when implementing ISO's rating products and services, resulting in new products and product changes being brought to market more quickly."

Delphi's business software solutions power the mission-critical operations of healthcare professional liability and property/casualty insurers competing in today's market. Delphi's solutions are designed using a modular approach, enabling insurers to select individual applications or a fully integrated solution driven by their business requirements and priorities. This provides the flexibility insurers need to respond to changing business needs by rapidly delivering better products and service to their policyholders while reducing operational costs, increasing operational efficiency, and improving business intelligence.

"We're very pleased to welcome Delphi to our growing ERC Associate program," said Mark Sheehan, Assistant Vice President for ISO Rating Solutions, which includes ISO Electronic Rating Content.

**About ISO**

Since 1971, ISO has been a leading source of information about property/casualty insurance risk. For a broad spectrum of commercial and personal lines of insurance, ISO provides statistical, actuarial, underwriting, and claims information and analytics; compliance and fraud identification tools; policy language; information about specific locations; and technical services. ISO serves insurers, reinsurers, agents and brokers, insurance regulators, risk managers, and other participants in the property/casualty insurance marketplace. ISO is a Verisk Analytics (Nasdaq:VRSK) business. For more information, visit [www.iso.com](http://www.iso.com) and [www.verisk.com](http://www.verisk.com).

**About Delphi Technology**

For more than 20 years, Delphi Technology has been the recognized leader in providing business software solutions to the healthcare professional liability industry. Its OASIS suite delivers a comprehensive range of proven software solutions, including underwriting, policy management, claims management, financial management, business intelligence, and predictive analytics.

Leveraging a highly flexible technology platform, OASIS enables companies to streamline their operations, optimize their business processes, and respond to changing business needs, resulting in reduced costs, increased operational efficiency, and improved business intelligence.

Delphi Technology utilizes a proven implementation methodology ensuring the transfer of critical technical, business, and market expertise throughout the deployment process, resulting in successful implementations that come in on schedule and on budget.

Headquartered in Boston, Massachusetts, Delphi Technology has offices throughout North America and in Shanghai, China.
