Delphi Technology Appoints New Vice President of Product Development

Former OneShield Veteran to Accelerate Delphi Technology's Leadership in Business Software and Technology Solutions for the Property and Casualty Insurance Market

Boston, MA – October 7, 2014 - Delphi Technology, Inc., the recognized leader in providing business software solutions to the healthcare professional liability industry and an emerging provider of business software solutions to the property and casualty insurance industry, today announced that it has appointed James Cen as the company's Vice President of Product Development.

Cen joins Delphi Technology from OneShield, where he most recently served as Senior Director of Software Architecture, responsible for all aspects of product development as well as building and managing a team of architects, developers, and product analysts. Prior to OneShield, Cen served in senior product development positions at Hotoffthewire.com, Fidelity Investments, and Digital Equipment Corporation.

Commenting on Cen's appointment, Sam Fang, Delphi Technology's CEO, said, "I am thrilled to announce James' appointment. His experience in enterprise architecture, meta-data driven application design and development, and data warehousing and database designs are valuable. We look forward to his technical leadership as we continue to expand our product and consulting services offerings, leverage our past successes, and establish a presence in new insurance markets".

Cen received a Bachelor's Degree in Astronomy from Beijing Normal University and a Ph.D. in Physics from Boston College.

About Delphi Technology

For more than 20 years, Delphi Technology has been the recognized leader in providing business software solutions to the healthcare professional liability industry. Its OASIS suite delivers a comprehensive range of proven software solutions including underwriting, policy management, claims management, financial management, business intelligence, and predictive analytics.

Leveraging a highly flexible technology platform, OASIS enables companies to streamline their operations, optimize their business processes, and respond to changing business needs resulting in reduced costs, increased operational efficiency, and improved business intelligence.

Delphi Technology utilizes a proven implementation methodology ensuring the transfer of critical technical, business, and market expertise throughout the deployment process resulting in successful implementations that come in on schedule and on budget.

Headquartered in Boston, MA, Delphi Technology has offices throughout North America and in Shanghai, China.
